ELECTRIC AND GAS METER REGISTRATIONS

1 9 5 8

The terms "Electric Meter Registrations" and "Gas Meter Registrations" are used throughout this report in reference to the number of meters in service as reported by companies engaged in the sale of electricity or gas in applications for certificate of registration. Each company is required to obtain a certificate of registration from the Department of Trade and Commerce not later than the 31st day of March in each year. Applications for certificate of registration filed during the fiscal year ended March 31, 1959 reported meters in service as at December 31, 1958.

Prior to 1956 most of the data contained in this report were presented in the "Report of the Standards Division" of the Department of Trade and Commerce. The Electric and Gas Meter Registrations report published by the Dominion Bureau of Statistics for 1956 was essentially the same report as that prepared by the Standards Division in previous years. Statistics of the Standards Division which did not relate specifically to electric and gas meter registrations were eliminated from the 1957 report. At the same time table headings were changed to show that meters are reported as at December 31st rather than for the fiscal year ended March 31, as indicated in previous reports. Included for the first time in the 1958 report is a table showing electric meter registrations by province and company.

The number of meters reported in service by companies engaged in the sale of electricity in Canada rose to 4,941,667 at December 31, 1958 from 4,748,636 one year earlier, an increase of 193,031 or 4.1 p.c. Meters employed in measuring electricity consumption at urban domestic rates numbered 3,160,389 as against 3,037,793 in 1957. Meters classed as urban commercial rose to 432,625 from 423,018 while those classed as urban power advanced to 100,636 from 97,770. Total meters in urban use went up 3.8 p.c. to 3,693,650 from 3,558,581. Of a total of 1,248,017 reported in rural service, 735,804 were classed as domestic, 407,160 as farm, 93,745 as commercial and 11,308 as power. Comparable figures for 1957 are as follows: total rural, 1,190,055; domestic, 696,171; farm, 392,432; commercial, 90,817; and power, 10,635.

A total of 1,110,960 gas meters was reported in service at the end of 1958, an increase of 9.3 p.c. over the 1,016,079 recorded in 1957. At year end only 35,967 meters remained in manufactured gas service as compared with 67,726 in 1957 and 610,096 in 1950, the year of peak concentration. Meters in natural gas service rose 13.4 p.c. to 1,069,892 from 943,783.

ELECTRIC AND GAS METER REGISTRATIONS

1 9 5 9

The terms "Electric Meter Registrations" and "Gas Meter Registrations" are used throughout this report in reference to the number of meters in service as reported by companies engaged in the sale of electricity or gas in applications for certificate of registration. Each company is required to obtain a certificate of registration from the Department of Trade and Commerce not later than the 31st day of March in each year. Applications for certificate of registration filed during the fiscal year ended March 31, 1960 reported meters in service as at December 31, 1959.

Prior to 1956 most of the data contained in this report were presented in the "Report of the Standards Division" of the Department of Trade and Commerce. The Electric and Gas Meter Registrations report published by the Dominion Bureau of Statistics for 1956 was essentially the same report as that prepared by the Standards Division in previous years. Statistics of the Standards which did not relate specifically to electric and gas meter registrations were eliminated from the 1957 report. At the same time, table headings were changed to show that meters are reported as at December 31st rather than for the fiscal year ended March 31, as indicated in previous reports. A table showing electric meter registrations by province and company was first compiled for the 1958 report.

The number of meters reported in service by companies engaged in the sale of electricity in Canada rose to 5,157,495 at December 31, 1959 from 4,941,667 one year earlier, an increase of 215,828 or 4.4 p.c. Meters employed in measuring electricity consumption at urban domestic rates numbered 3,307,817 as against 3,160,389 in 1958. Meters classed as urban commercial rose from 432,625 to 443,697 while those classed as urban power advanced to 104,582 from 100,636. Total meters in urban use went up 4.4 p.c. to 3,856,096 from 3,693,650. Of a total of 1,301,399 reported in rural service, 780,502 were classed as domestic, 411,991 as farm, 97,155 as commercial and 11,751 as power. Comparable figures for 1958 are as follows: total rural, 1,248,017; domestic, 735,804; farm, 407,160; commercial, 93,745; and power, 11,308.

A total of 1,199,743 gas meters was reported in service at the end of 1959, an increase of 8.0 p.c. over the 1,110,960 recorded in 1958. At year end only 32,799 meters remained in manufactured gas service, as compared with 35,967 in 1958 and 610,096 in 1950, the year of peak concentration. Meters in natural gas service rose 8.7 p.c. to 1,162,678 from 1,069,892.

For purposes of inspection under the Electricity Inspection Act and the Gas Inspection Act, the provinces of the Dominion have been divided into the following districts:
